

DANG THO BACH

Backend Developer

► 0968898538

► dangthobach@gmail.com

► Nov 20,1997

SUMMARY

- Back-end developer with almost 6 years of experience in Java and Spring Boot.
- Technical background, with good understanding in software development including Web (BE & FE) and Server technologies.
- Strong experience working in Spring Ecosystem: Spring Boot, Spring Data JPA, Hibernate, SOAP/RESTful Webservice, Spring Security, Spring Batch,...
- Strong knowledge of relational databases designing especially Oracle.
- Strong experience in software development models: Agile / Scrum.
- Hands-on experience in CI/CD pipelines and containerization (Docker, Kubernetes).
- Adept at troubleshooting complex systems, collaborating with cross-functional teams, and delivering robust backend solutions to meet business goals.
- Experience integrating and maintaining security tools such as: SonarQube (required); Coverity (SAST) and Blackduck (SCA)

EDUCATION

Hanoi University Of Industry

Sep 2015 – June 2019

Specialization: Software Technology

GPA : 3.37

EXPERIENCE

Sai Gon – Ha Noi Bank(SHB)

Sep 2022 - Present

Software Engineering

Alphaway Technology Company

Aug 2019 – Aug 2022

Software Engineering

Ominext JSC

Dec 2018 – Jun 2019

Java Developer

PROJECT

Corebank(Intellect)

(Sep 2022 - Now)

Customer	SHB
Description	Develop hygiene functions around the core-banking system in modules
Number of members	10
Position	Developer
Role	- Maintain and fix issues web system on demand. - Develop send mail function lending, tide modules. - Develop update expired identity documents according to Circular 17/2024/TT-

	NHNN of the State Bank with high performance. - Scan code application with BlackDuck, Coverity before uplive.
Technologies	- SpringBoot, RestAPI, Oracle(PL/SQL), Spring data JPA as main technology. - Apply Microservice on Containerization(Docker, Kubernetes) . - Intergrate security tool: Blackduck for checking vunerable open-source, dependencies, Coverity for scanning static code.

Corecard(SmartVista)

(Sep 2022 - Now)

Customer	SHB
Description	Develop hygiene functions around the core card system: issuing card/pin, reporting mastercard, visa, accounting and reporting smartvisa to CBS and versus, manage ATM/POS
Number of members	4
Position	Developer
Role	- Deploy Keycloak identity provider, support integration and configuration of other systems in organization. - Deploy new CardUtility according to Microservice architecture Containerization(Docker, Kubernetes) to meet upgraded SVNG system. - Migrate CardUtility functions phase 1 (13 functions) and phase 2 (4 functions are completing documentation for golive). - Evaluate feasibility and deploy requirements for batching and report. - Deploy pipeline on Gitlab to serve CI/CD CardUtility. - Deploy ELK CardUtility on container. - Develop update expired identity documents according to Circular 17/2024/TT-NHNN of the State Bank. - Optimize scripts cutoff data expired identity documents with million records in seconds according to Circular 17/2024/TT-NHNN of the State Bank. - Scan code application with BlackDuck, Coverity before uplive.
Technologies	- SpringBoot, RestAPI, Oracle(PL/SQL), Spring data JPA as main technology. - Apply Microservice on Containerization(Docker, Kubernetes). - Integrate Keycloak idp for SSO organization. - Build reports on JasperReport. - ELK for monitor resource and tracing logs. - Integrate security tool: Blackduck for checking vunerable open-source, dependencies, Coverity for scanning static code.

Way4Batch

(Jan 2022 - Aug 2022)

Customer	Military Bank
Description	Job Scheduling System
Number of members	13
Position	Developer
Role	- Build up job scheduling for issuing card, accounting payment 2 point with multithread, reissuing card, changing limit. - Update version jdk 1.6 -> jdk 11 - Complete sprints goal when develop request improvement through Agile
Technologies	Springboot, SOAP/RESTful WebService, JDBC, Oracle(PL/SQL) as main technology

CardIssue

(Jan 2022 - Aug 2022)

Customer	Military Bank
Description	Build services for the integrator
Number of members	13
Position	Developer
Role	- Build up gateway issuing Unionpay card, virtual card (card by code) - Complete sprints goal when develop request improvement through Agile
Technologies	Springboot, SOAP/RESTful Webservice, JDBC, Oracle(PL/SQL) as main technology

CardPortal

(Jan 2022 - Aug 2022)

Customer	Military Bank
Description	Build services for the integrator
Number of members	13
Position	Developer
Role	- Develop functions according to business requirements: issuing, reports, pin management, reissuing, updating information customer, stoplist/blacklist card - Complete sprints goal when develop request improvement through Agile
Technologies	Window Server, Ext Framework, SOAP Webservice, Oracle(PL/SQL) as main technology, Way4(corecard system)

CardGateway

(Jan 2022 - Aug 2022)

Customer	Military Bank
Description	Card management system for operation, card lot processing counter channel
Number of members	3
Position	Developer
Role	- Develop functions according to business requirements. - Configure key for partner channels. - Configure sms message: balance, active/close MCredit/MB card - Complete sprints goals when develop request improvement through Agile
Technologies	Window Server, Ext Framework, SOAP Webservice, Oracle(PL/SQL) as main technology, Way4(corecard system)

Wealth Managerment Project

(Oct 2021 – Dec 2021)

Customer	Military Bank
Description	Wealth Managerment
Number of members	30
Position	Developer

Role	- Build user administration via Keycloak - Building a portfolio restructuring function for experts - Build settlement function for experts - Build up CRUD customer API - Complete sprints goal when develop request improvement through Agile
Technologies	Spring Cloud, KeyCloak, SOAP/RESTful WebService, Oracle as main technology

Wallet core conversion project

(Jan 2021 – Sep 2021)

Customer	Military Bank
Description	Migrate viettelpay wallet from core card
Number of members	7
Position	Developer
Role	- Modify the function to build the connection stream to the wallet core: Query the balance without pin, close card unlock, beneficiary information query, customer status sync, transaction history query - Build cash withdrawal function via app (Cash by code) - Complete sprints goal when develop request improvement through Agile
Technologies	Spring, Oracle, SOAP/RESTful WebService as main technology, Socket ISO8583

Credit Rating

(Jan 2021 – June 2021)

Customer	An Binh Bank
Description	Credit rating system for individuals and businesses
Number of members	4
Position	Developer
Role	- Build scoring screens, manage customer records, CIC records. - Unit testing of building functions. - Fixbug the build functions. - Build reports on JasperReport.
Technologies	Idempiere Server, JDBC, ZK Framework, Oracle as main technology

Credit Rating

(Apr 2020 – Dec 2020)

Customer	Lien Viet Postbank
Description	Credit rating system for individuals and businesses
Number of members	7
Position	Developer
Role	- Build scoring screens, manage customer records, CIC records. - Unit testing of building functions. - Fixbug the build functions. - Build reports on JasperReport.
Technologies	Idempiere Server, JDBC, ZK Framework, Oracle as main technology

eCabinet

(Aug 2019 – Mar/2020)

Customer	Government
Description	System for serving meetings and handling government affairs
Number of members	8
Position	Developer
Role	- Building functions of screens: News page, meeting management, voting, users, permissions. - Unit testing of building functions. - Fixbug the build functions.
Technologies	J2EE, JSP/Servlet, JDBC, DB2, IBM WebSphere Application Server as main technology

Secom

(Mar 2019 – June 2019)

Customer	Japanese customer
Description	Electronic medical record system
Number of members	7
Position	Developer
Role	- Maintain and fix issues web system on demand
Technologies	J2EE, JSP/Servlet, JDBC, DB2, IBM WebSphere Application Server as main technology

Fine Medical

(Dec 2018 - April 2019)

Customer	Japanese customer
Description	Private pharmacy management system
Number of members	6
Position	Developer
Role	- Develop CRUD screens on demand
Technologies	SpringBoot, Hibernate, JSF, MySQL as main technology
